

Name: Cristal, Mary Kristine Anne L.

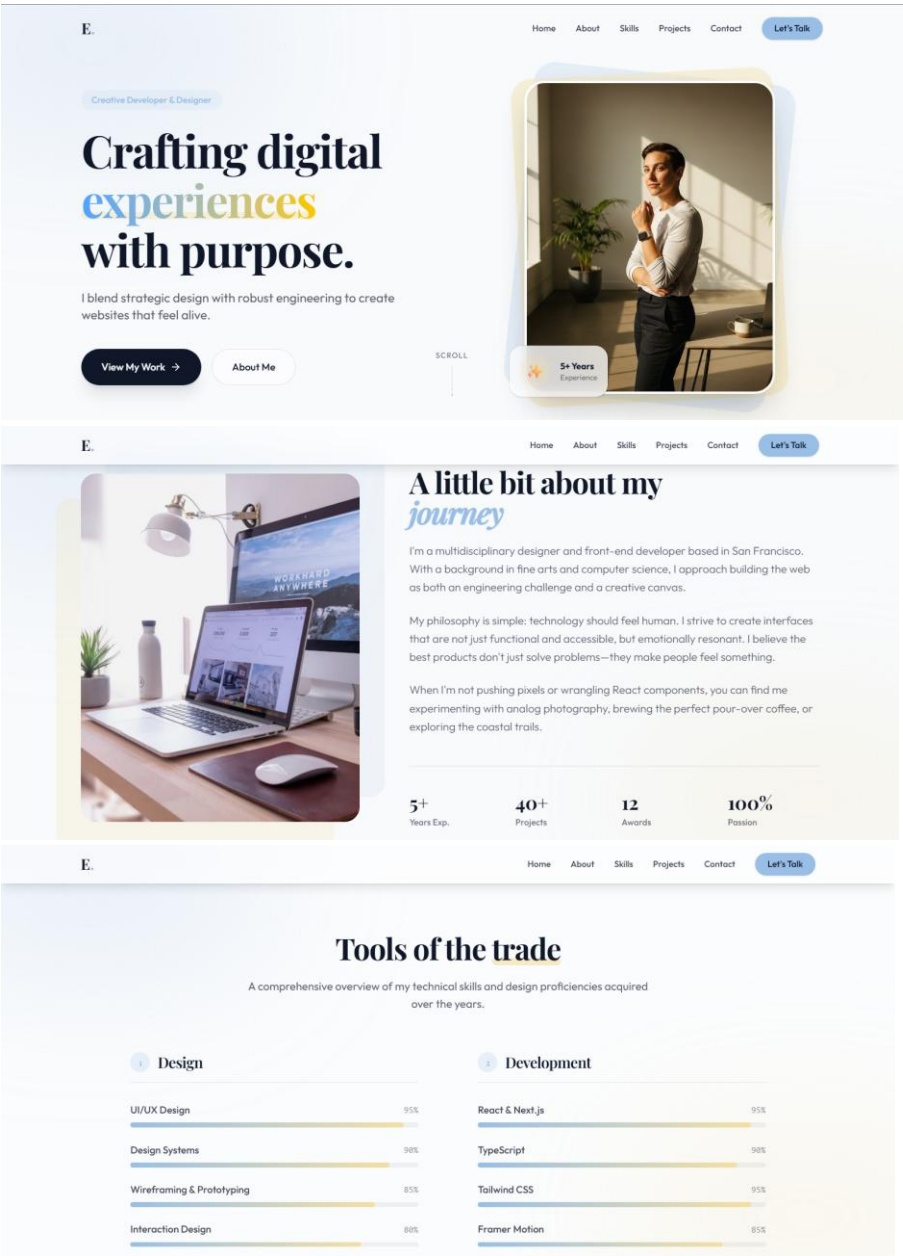

Laboratory 9: One-Page Website Creation & Deployment using Replit

My Personal Portfolio

Initial Prompt

I want you to create a one-page website for a personal portfolio project. Make sure it has sections included such as Home, About Me, My Skills, My Projects, and Contact Information. For the color scheme, I want you to make an inspiration of a clean and modern design with pastel colors of blue and yellow combination. Make sure the website you will create is responsive, clickable, and visually appealing.

Result: <https://d368ff18-c280-409b-8e4f-537b956b197c.riker.prod.repl.run/>

Refinement Prompts

- A. I want you to change the information, instead of creative developer and designer, state in the website that I am a 3rd year civil engineering student from Ateneo de Davao University. Just expand it properly. Adjust the sections accordingly. And for the contact information, follow the information below:

Name: Mary Kristine Anne L. Cristal

Email: mkalcristal@addu.edu.ph

Location: Ateneo de Davao University

Result: <https://f29f3dff-eeef-466d-aaaa-5fc75b920b40.riker.prod.repl.run/>

- B. Adjust or change the background, I don't want a plain white since its not engaging enough. Rewrite and improve the content of my one-page portfolio website to sound more professional and engaging. Strengthen the About Me section with a compelling personal introduction, highlight key skills clearly, and make project descriptions concise but impactful. Ensure the tone reflects a confident and modern personal brand.

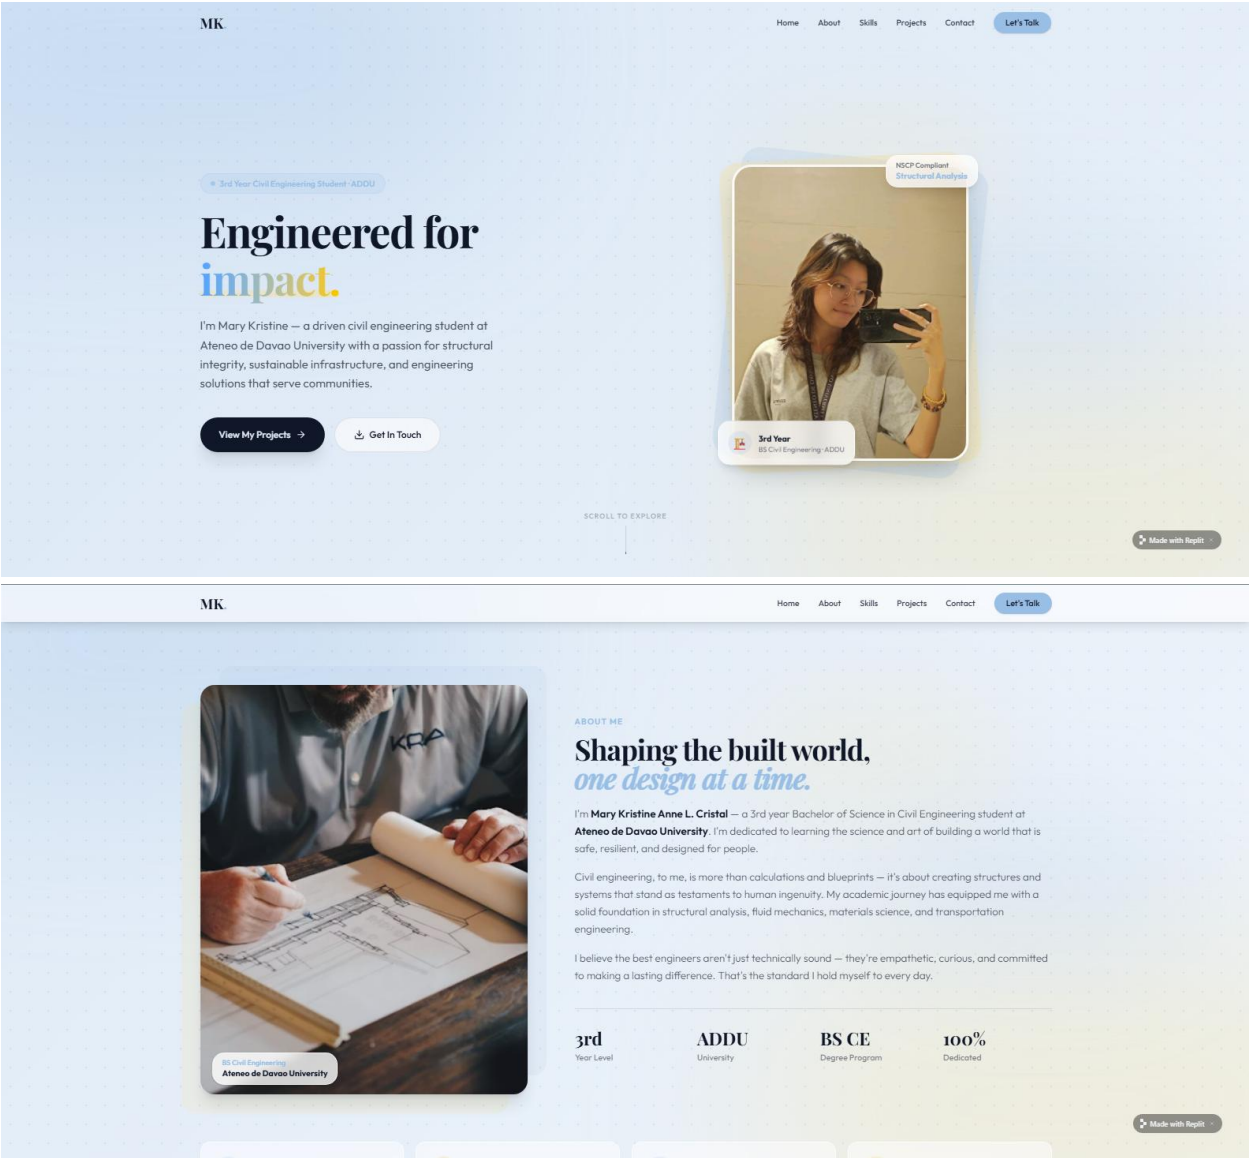

Result: <https://cf34ce03-ed66-4a8f-8575-59ef9f711c0e.riker.prod.repl.run/>

- C. Replace the picture in the website to this. Also, Enhance the visual appeal of my one-page portfolio by adding subtle animations and interactive elements such as hover effects, transitions, and scroll animations. Use a modern pastel blue and yellow color palette. Include visually appealing project cards, skill progress indicators, and a clean font pairing.

Result: <https://f81ec7c0-fe6e-4918-bf52-fe20e26d51f8.riker.prod.repl.run/>

Academic Excellence

Pursuing a rigorous BS Civil Engineering curriculum with a strong focus on structural and hydraulic engineering principles.

Precision-Driven

Committed to accuracy in calculations, design compliance, and delivering work that meets the highest engineering standards.

Problem Solver

Trained to approach complex engineering challenges analytically – breaking down problems and engineering effective, lasting solutions.

Community-Focused

Motivated by the opportunity to design infrastructure that directly improves the lives of communities across the Philippines.

MY SKILLS

Built on a strong foundation

A rigorous civil engineering curriculum has sharpened my technical skills – from structural computation to hydraulic design – grounded in real-world application and NSCP standards.

KEY COMPETENCIES

NSCP Code Application

National Structural Code of the Philippines

Load & Stress Computations

Dead, live, wind & seismic loads

Hydraulic System Design

Channels, drainage & irrigation

Pavement & Road Design

Traffic volume & material analysis

Construction Supervision

Site inspection & quality control

Technical Documentation

Accurate engineering reports & drawings

SOFTWARE & PLATFORMS

AutoCAD

Microsoft Excel

STAAD.Pro

SketchUp

Google Workspace

MY PROJECTS

Engineering in *action.*

Selected academic and community-based projects that demonstrate applied engineering knowledge, analytical rigor, and a commitment to real-world impact.

Collaborate with me

NSCP Compliance

STRUCTURAL ENGINEERING - ACADEMIC

Structural Load Analysis of a Multi-Story RC Building

Performed full dead, live, wind, and seismic load analysis on a reinforced concrete multi-story structure in accordance with the National Structural Code of the Philippines. Produced detailed load combinations and structural response evaluations.

Source

Community Impact

HYDRAULICS & WATER RESOURCES - COMMUNITY

Storm Drainage Design for Flood-Prone Barangay

Designed a storm drainage network to address chronic flooding in a Davao City barangay. Included watershed delineation, rational method computations, and channel sizing – delivering a cost-effective, implementable drainage solution.

Field Research

TRANSPORTATION ENGINEERING - RESEARCH

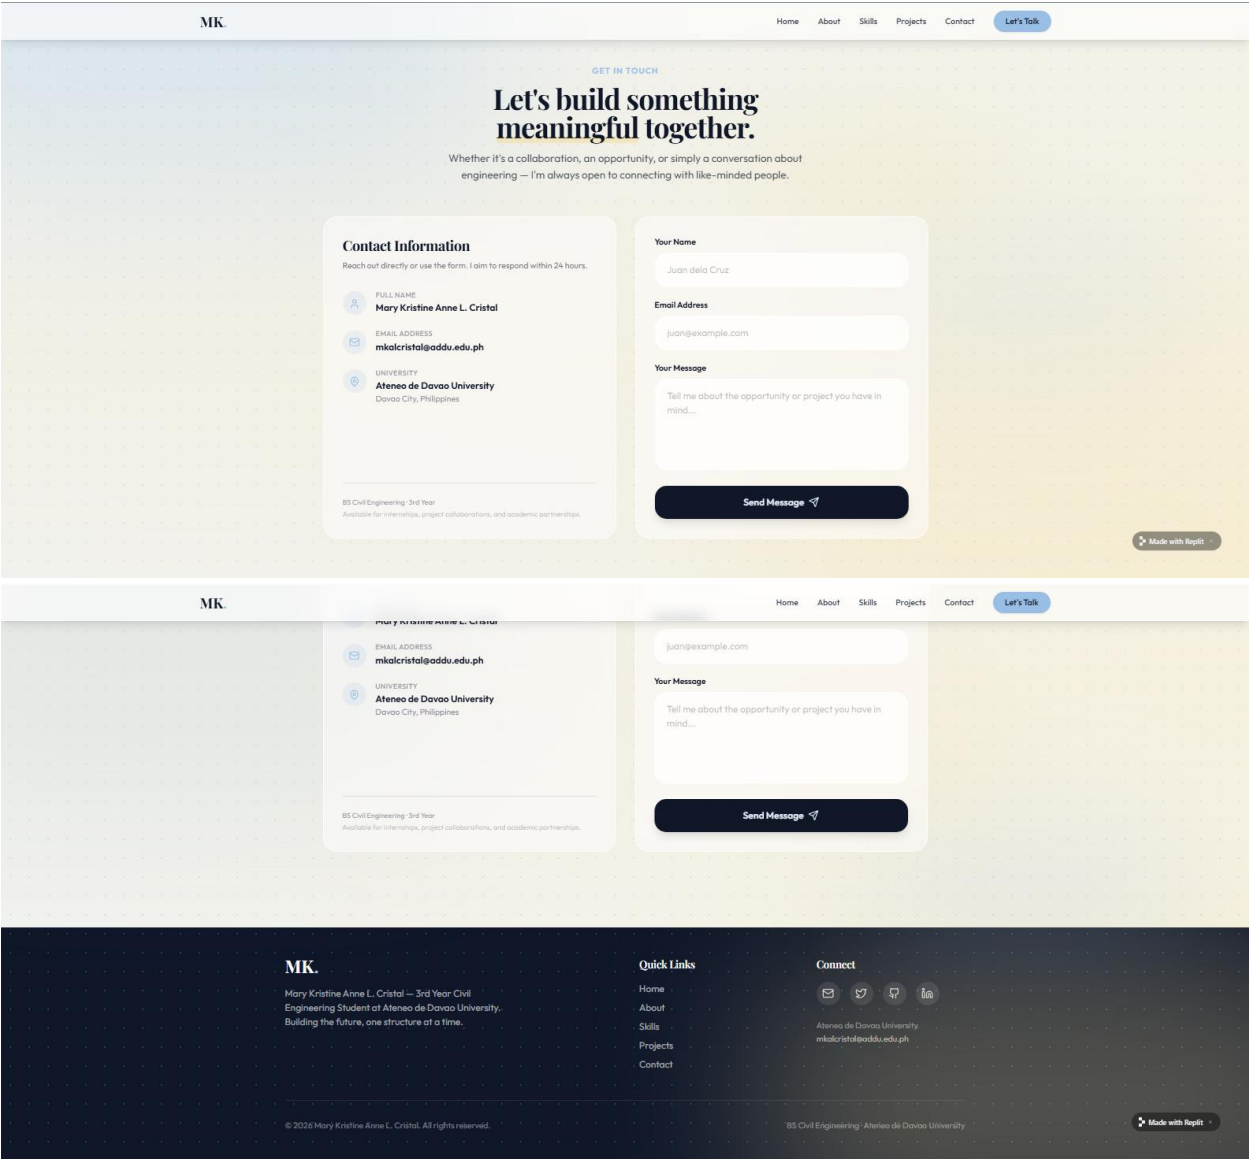

Pavement Condition Assessment & Rehabilitation Plan

Evaluated the surface condition of a local road segment using standard PCI methodology. Analyzed traffic volume data to recommend an optimal rehabilitation strategy, balancing structural performance with budget efficiency.

Final Reflection:

When doing this laboratory activity, I actually learnt It faster that expected since technically it’s the same thing as formulating a prompt in well-known ai tools such as chatgpt and gemini. So when using Replit, it was easier than what I was expecting. So, the initial prompt worked out better; the overall layout, color scheme and combinations, structure of the wensite, and etc. The ai was able to generate the necessary sections I mentioned, but I had to fix some parts since some are not to my liking such as the information. I had to change it to my name and others, expecially the picture. I also had to adjust the color since the result of the initial prompt was just plain white. Also, I stated to improve the responsiveness, the subtle animations and hovering. It all worked out at the very end. Lastly, what I learned about the prompting is that it needs to be specific and well-written so that the ai will follow it precisely and making sure that you will get the best results from the prompt. In addition, clear instructions will help reduce the need for more refinement prompts and corrections.
